

IMPORTANT NOTE:

DO NOT FEED THE SYSTEM WITH ONE CIRCUIT AND LOOP THE TWO ACTIVE TERMINALS.

If you only use one circuit to feed the system, under fault conditions the whole system will shut down and the alarm will not operate.

NOTE: We strongly recommend the use of Anaconda Flexi Conduit on all installations or similar UV resistant and mechanical dame resistant conduit.

THE WARRANTY WILL BE VOID UNLESS TWO CIRCUITS ARE USED.

bioCycle™ will not be responsible for any problems, malfunction, damage or any other consequences which result directly or indirectly from failure to comply with any of the instructions above. Current as January 1, 2012 and subject to change without notice.
